

Data Management Intern

AIB: June 23 -> August 23

During my **summer internship** at AIB, I worked on modernising **data management processes** for the lending division. My primary responsibility was converting a **large volume** of **historical paper records** into structured digital formats, such as **Excel spreadsheets** and **database-ready files**. This involved meticulous **data entry**, **validation**, and organisation to ensure accuracy and consistency. Additionally, I helped **streamline data workflows**, making retrieval and analysis more efficient for the team. Through this experience, I developed strong skills in **data handling**, **digitization strategies**, and **process optimization** within a financial services context.

Education

Trinity College Dublin

B.A. in Integrated Computer Science: Sep 23 -> May 27
